

Microcentrifuge Tube and Screw Cap

Our gamma irradiated microcentrifuge tubes are highly recommended in the areas of Life Science, Industry or Chemistry for use in research and critical reagent packaging requirements.

Our tubes are designed with conical bottoms allowing for complete sample retrieval. Screw caps with O-rings guard against leakage by forming a positive seal against the rim of the tube. External ribs on the free standing microcentrifuge tubes allow for single-handed opening and closing when placed in racks with serrated holes. Screw Cap Microcentrifuge Tubes work with many automated systems. The O-ring is manufactured from durable ethylene polypropylene dimonomere compound.
